Power Company To Lower Lake

Huntington Lake, one of Southern California Edison Company's hydroelectric storage reservoirs in the High Sierra, sixty miles northeast of Fresno, is scheduled for an unusual drawdown during the latter part of this summer.

L. E. Jenkins, Edison district manager, said that the Lake will be nearly full about July 1. Lowering of the water level is expected to begin after the July Fourth holiday week end and will continue through September. It is estimated, he said, that the Lake will be low-

ered about eighty feet by September 1. The drawdown is necessary, Jenkins explained, to make possible the frost-proofing of Huntington Lake dams, together with other preventive maintenance work.

In order to complete the job before winter sets in, the work must begin immediately following the start of the drawdown. The Edison Co. will spend about three-quarters of a million dollars on the project.

Dirt Sale Approved

Approval of sale of City Dump dirt to Peter Kiewit Sons Co. of Nevada at 10 cents per cubic yard was given Tuesday night by Torrance City Council. The company is planning to bid on Harbor Freeway between 92nd St. and Gage Ave. in Los Angeles, and will need from 70,000 to 250,000 cubic yards.
